About CV2

All credit and debit cards carry a security code number. This number is known to the bank and printed on the card, but is not stored or printed anywhere else. Therefore, it can be used as a check that when you make your purchase you are in physical possession of the card, or have at least seen the card at some time.

MasterCard/Visa/Switch Cardholders

Your Card Security Code is the three digits at the end of the card number printed on the signature panel.
